be visionary

LIMB Gallery, the solution to create your digital library

LIMB Gallery, the easiest & fastest way to create and manage your collections online. Simply import your media : images, videos, audio and metadata associated.

Let the world discover your collections with LIMB Gallery.

LIMB Gallery is easy to use and offer a modern and customisable interface: Page flipping view for books | Mosaic view | Table of content | Search inside document | High speed deep zoom | Share content (email, social networks).
The overall LIMB Gallery presentation is made to be simple and clear for a rich user experience.

Four models of graphical interfaces are available with a complete access to the source code to adapt the look and feel to your graphical environment (logo and colors of your institution)

LIMB Gallery is available either as a fully hosted SaaS digital library solution or as an on-site solution, installed locally.

LIMB Gallery software can be easily connected to i2S LIMB software suite. It allows managing the entire digitization workflow thanks to LIMB Maestro and enriching images with LIMB Processing.
What do they think about LIMB Gallery?

« Choosing LIMB Gallery for INHA digital library is explained by many visualization features offer by this solution (…) the power and the constant evolution of the digital library seduced the INHA Library»

For the third and final phase of the project – disseminating the content online – the ITU team sought a powerful and user-friendly digital delivery system to showcase the collection. After researching the market, ITU selected LIMB Gallery, Library and Archives Service - Switzerland

The Graduate Institute Geneva certifies the quality of services for the setting up of their digital library. They highlight the timeless of the projects and the technical quality the availability and responsiveness of the IT service and the quality of the software training and the technical follow-up. Yves Corpataux - Library Director

About i2S
SOLUTIONS FOR YOUR DIGITIZATION PROJECTS

i2S is a company specialized in image capturing and processing technology.

We work for international clients, on a wide range of markets like: health and well-being, sport, software, document digitization, food-processing and agriculture, aviation and aerospace, robotics and industrial control systems, and more generally, wherever image capturing is required.

i2S creates and markets a whole range of scanners and software intended for historical archives and bound documents digitization and promotion. Most of our customers are content owners such as museums, libraries, archives, administrations and a few large companies. Our clients value our innovative solutions which encompass the complete process of a digitization project: capturing, processing, enriching and sharing. In order to meet the need for digitizing varied and precious collections, we designed the largest range of book scanners on the marketplace – from the smallest size to 2A0 format, including robot scanners.

Today, more than 4.000 book scanners are installed at more than 1.000 customers' sites around the world.

At i2S we work with passion and dedication for our customers, taking up the challenge of putting innovation at the service of digitization projects efficiency.
